#### emd equipped™

Breakthrough technology replaces a conventional thermostat with an advanced electronic energy management system to cool quicker and maintain a more consistent temperature, while saving precious electricity.

#### green advantage™

By combining EMD control with ECM fans, electronic expansion valves and high-performance coils, we are able to further reduce energy consumption while improving cooling performance.

#### low e cabinet™

A superior combination of LED lighting, polyurethane insulation and low emissivity glass yields power savings around 40% lower than conventional refrigeration units.
